

## **Poso Creek IRWM Plan Implementation Activity and Correspondence for March 2019**

### **PLAN UPDATE**

- Several of the Chapters are in final draft. Additional chapters will be sent out as they are compiled into a draft document. Project descriptions and overall project list were updated.

### **OUTREACH/DAC's**

- On behalf of the Poso Creek IRWM RWMP, GEI participated in a DAC outreach workshop on May 30 with Self-Help Enterprises. The purpose of this workshop was to gather information on possible future projects in DACs and discuss projects the group is considering for TKFA DACIP funding.
- A list of DAC projects continued to be refined during the month as GEI continued coordination with the Division of Drinking Water, Kern County and Maria Herrera of Self-Help Enterprises. GEI continued to meet with Self-Help Enterprises to confirm status and inclusion of the smaller communities within Poso Creek IRWM. Through this program, there is outreach and DAC engagement funding provided to Self-Help who is conducting surveys and assisting the Region with identifying communities who are willing to actively participate in the IRWM program.
- Tulare-Kern DAC Involvement Program – Project Advisory Committee (PAC). PAC Meetings are held bi-monthly. Currently the PAC is focused on directing the needs assessment tools that Provost & Pritchard is developing, and the Outreach and Engagement work that Self-Help is conducting. Frank O., Stephanie H. and Christine Gutierrez are actively participating in the meetings on behalf of the Poso Creek IRWM/DACs. Each of the 7 IRWM's are to receive funding to implement the advancement of projects.

### **PROJECTS/FUNDING**

- Prop 1 DACIP Funding: \$3.4M; ~\$250K project funding per IRWM.
- The following pages lists status of existing grant awards, agreements, and applications

# POSO CREEK IRWMP

Management Group

1101 Central Avenue, Wasco, CA 93280
